Standard Form 424 (REV. 4-88)  
Prescribed by OMB A-102

**FORM 2**  
**MCH BUDGET DETAILS FOR FY 2006**

[Secs. 504 (d) and 505(a)(3)(4)]

**STATE: AK**

**1. FEDERAL ALLOCATION**

(Item 15a of the Application Face Sheet [SF 424])  
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 1,174,208

A.Preventive and primary care for children:

\$ 352,262 ( 30%)

B.Children with special health care needs:

\$ 387,489 ( 33%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 117,420 ( 10%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

**2. UNOBLIGATED BALANCE** (Item 15b of SF 424)

\$ 50,000

**3. STATE MCH FUNDS** (Item 15c of the SF 424)

\$ 7,586,098

**4. LOCAL MCH FUNDS** (Item 15d of SF 424)

\$ 0

**5. OTHER FUNDS** (Item 15e of SF 424)

\$ 0

**6. PROGRAM INCOME** (Item 15f of SF 424)

\$ 0

**7. TOTAL STATE MATCH** (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 4,471,700

\$ 7,586,098

**8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)**

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 8,810,306

**9. OTHER FEDERAL FUNDS**

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 100,000

c. CISS: \$ 0

d. Abstinence Education: \$ 88,501

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 0

h. AIDS: \$ 0

i. CDC: \$ 3,282,148

j. Education: \$ 0

k. Other: \$ 0

HRSA Other \$ 236,667

Title X \$ 527,092

**10. OTHER FEDERAL FUNDS** (SUBTOTAL of all Funds under item 9)

\$ 4,234,408

**11. STATE MCH BUDGET TOTAL**

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 13,044,714

FORM NOTES FOR FORM 2

FIELD LEVEL NOTES

1. Section Number: Main

Field Name: CDC

Row Name: Other Federal Funds - CDC

Column Name:

Year: 2006

Field Note:

CDC funding includes the following:

1. Oral Health: \$337,000 plus \$27,600 as a supplemental (tentative award)

2. Early Hearing Detection and Intervention: \$142,500 for a three year competitive grant.

3. Breast and Cervical Cancer Grant as part of the Comprehensive Cancer Grant: \$2,577,313 (tentative award)

4. Pregnancy Risk Associated Monitoring System: \$147,307 + \$50,428 in carryover

2. Section Number: Main

Field Name: OtherFedFundsOtherFund

Row Name: Other Federal Funds - Other Funds

Column Name:

Year: 2006

Field Note:

HRSA other funds includes the following:

1. Oral Health: \$65,000

2. Universal Newborn Hearing Screening: \$125,000 for three years-this was a new competitive cycle

3. Western State and Territories Collaborative Genetics Grants: \$46, 667 (years one and two combined)

Title X include the base award of \$419,158 plus directed supplementals of \$107,934

## FORM NOTES FOR FORM 3

None

### FIELD LEVEL NOTES

1. **Section Number:** Main  
**Field Name:** FedAllocExpended  
**Row Name:** Federal Allocation  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
Reciepts from Medicaid reduced the need for the block grant funds to be expended
2. **Section Number:** Main  
**Field Name:** FedAllocExpended  
**Row Name:** Federal Allocation  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
Grant award was slightly less than what was expected for FFY04
3. **Section Number:** Main  
**Field Name:** UnobligatedBalanceExpended  
**Row Name:** Unobligated Balance  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
Unobligated balance was fully spend in preparation for further dismantling of the Title V programs and distribution of funds both federal and state to five other divisions.
4. **Section Number:** Main  
**Field Name:** StateMCHFundsExpended  
**Row Name:** State Funds  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
We underestimated what our budget would be; there was specifically an underestimate of what the general funds would be.
5. **Section Number:** Main  
**Field Name:** StateMCHFundsExpended  
**Row Name:** State Funds  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
Because some of the MCH programs were placed in with the Medicaid program administrative division, use of some state funds was markedly reduced. Secondly, with MCH programs distributed in other divisions and no longer part of the span of control of the Title V Director, the ability to count them as federal-state partnership maintenance of effort no longer was present. In addition, a significant shift of available G.F away from DHSS occurred during this fiscal year's legislative session.
6. **Section Number:** Main  
**Field Name:** LocalMCHFundsExpended  
**Row Name:** Local MCH Funds  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
There is only one Local public health department and it is located in Anchorage. They are recipients of state general funds and federal funds to run their MCH programs and thus they do not contribute to the state wide efforts.
7. **Section Number:** Main  
**Field Name:** OtherFundsExpended  
**Row Name:** Other Funds  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
No other funds were received
8. **Section Number:** Main  
**Field Name:** ProgramIncomeExpended  
**Row Name:** Program Income  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
No program income was recieved, nor was it expended
9. **Section Number:** Main  
**Field Name:** OtherFedFundsExpended  
**Row Name:** Other Federal Funds  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
Unable to expend all of the grant funds awarded due to impact of the reorganization of the Department of Health and Social services and the dismantling of the Section of Maternal Child and Family Health. In the last two quarters of FFY03, there was a significant drop in program activity and productivity due to the uncertainty of the future. Have submitted carry over requests with plans for expending in SFY05 or FFY05.
10. **Section Number:** Main  
**Field Name:** OtherFedFundsExpended  
**Row Name:** Other Federal Funds  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
Due to the reorganization of DHSS and the associated dismantling of the Title V section of MCFH, program receiving state general funds were no longer in the span of control of the Title V director and thus could not be used in the calculation of the federal state partnership maintenance of effort totals.

## FORM NOTES FOR FORM 4

None

### FIELD LEVEL NOTES

- 1. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** PregWomenExpended  
**Row Name:** Pregnant Women  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
An overestimate of the budget occurred due to the anticipated increase of pregnant women who would not have any health care coverage as a result of the change in Medicaid eligibility levels from 200% FPL to 175% FPL. Although the decrease in eligibility levels occurred by legislative mandate, it was not effective until October 1, 2003. The area of pregnant women and their needs will be a focus of the 5 year needs assessment.
- 2. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** PregWomenExpended  
**Row Name:** Pregnant Women  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
As a result of the reorganization of the MCH programs, budget decision were made at the Assistant Commissioner level with input from the Title V director and the CSHCN director at the time. An increase over the anticipated budget in MCH block grant and program funds were allocated to the Section of Nursing in support of pregnant women. In addition, MCH block grant funds and general funds were allocated in support of the MCH Epidemiological staff with a focus on MCH surveillance. Thus a greater percentage was expended in this area than budgeted.
- 3. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_0\_1Expended  
**Row Name:** Infants <1 year old  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**
- 4. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_0\_1Expended  
**Row Name:** Infants <1 year old  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
As a result of the reorganization, previous MCH programs were distributed between 5 division and a significant amount of state general funds did not follow the programs. Of particular significance was the dismantling of the SCHIP, aka Denali KidCare, outreach program funded with state dollars. In addition, the Maternal-Infant Mortality Review Committee was defunded resulting in a loss of this function for this fiscal year.
- 5. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_1\_22Expended  
**Row Name:** Children 1 to 22 years old  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
Anticipated revenues for conducting the SCHIP outreach and Perinatal case management for high risk pregnant teens were not received, thus expenditures were higher than anticipated
- 6. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_1\_22Expended  
**Row Name:** Children 1 to 22 years old  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
As a result of the reorganization, all of the funds supporting Adolescent Health were transferred to the Office of Children's Services in FY03 and then the program was defunded by the end of that fiscal year. All of the children's health programs and CSHCS programs moved into the Division of Health Care Services which the Medicaid operations division. With this transfer, all of the programs for ages 1-22 lost their general fund dollars and these were supplanted with Medicaid dollars. As a result the total match historically supported by GF was decreased.
- 7. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** CSHCNExpended  
**Row Name:** CSHCN  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
Information at the time of budgeting was insufficient to anticipate the overall impact of the reorganization and the resulting distribution of revenue and expenses. The budget for FY05 has been increased to anticipate expenditures. The budget for FY04 was also increased.
- 8. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** CSHCNExpended  
**Row Name:** CSHCN  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
Although the reorganization resulted in the early intervention program moving to the Office of Children's Services, they maintained their state general fund support. Other programs in this category such as FAS surveillance, birth defects registry and others lost state fund support and this our total expended dollars in this category was less than budgeted.
- 9. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** AllOthersExpended  
**Row Name:** All Others  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
The impact of the reorganization and the resulting distribution of revenue and expenses was difficult to anticipate at the time of budgeting.
- 10. Section Number:** I. Federal-State MCH Block Grant Partnership  
**Field Name:** AllOthersExpended  
**Row Name:** All Others  
**Column Name:** Expended

**Year:** 2004

**Field Note:**

Several state funding sources ended with the reorganization including pregnancy prevention, state nutrition funding, and others. This resulted in a decrease in availability of state dollars for use in this category then budgeted.

**11. Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** AdminExpended

**Row Name:** Administration

**Column Name:** Expended

**Year:** 2003

**Field Note:**

Reorganization of the department resulted in a decrease in productivity and activities performed due to the uncertainty of the future for programs and staff. The last two quarters expenditures particularly decreased as a result of significant cost containment measures put into place by the new administration.

**12. Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** AdminExpended

**Row Name:** Administration

**Column Name:** Expended

**Year:** 2004

**Field Note:**

With reorganization of DHSS and the dismantling of the MCH section, there was a significant amount of infrastructure lost and or changed through the transition. As a result many positions were lost or transferred to other divisions and the need for administrative support and infrastructure was greatly reduced. With the bulk of programs transferred to the Division of Health Care Services, the operational Medicaid division, many of the management positions were funded using Medicaid dollars as these positions offered badly needed advanced practice and clinical expertise.

### FIELD LEVEL NOTES

- 1. Section Number:** Main  
**Field Name:** DirectHCBudgeted  
**Row Name:** Direct Health Care Services  
**Column Name:** Budgeted  
**Year:** 2005  
**Field Note:**  
The budget for the coming year is slightly increased over last years in anticipation of increased expenses associated with adding clinic days for newborn metabolic screening. In addition, support for family planning clinics is anticipated as a result of decreased revenue to maintain public health nursing services.
- 2. Section Number:** Main  
**Field Name:** DirectHCExpended  
**Row Name:** Direct Health Care Services  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
Underestimated budget at the time it was submitted. The section was faced with a need and an opportunity to increase services to children with special health care needs in particular in the areas of neurology through outreach specialty clinics, family support through a contract with Stone Soup parent navigation and other contractual relationships. The budget for FY05 has been slightly increased in anticipation of this ongoing need.
- 3. Section Number:** Main  
**Field Name:** DirectHCExpended  
**Row Name:** Direct Health Care Services  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
As the availability of pediatric sub-specialty services increased in the state, the need to utilize as much direct funding was reduced. Cardiac clinics were reduced to one session only in the southeast area of the state and then state sponsorship was eliminated altogether as there are now three pediatric cardiologists who reside in the state and are able and interested in traveling on their own to conduct clinics throughout the state. A reduction in the number of scheduled genetics clinics occurred as on the tribal facilities was unable to accommodate the physicians in their medical staffing bylaws.
- 4. Section Number:** Main  
**Field Name:** EnablingExpended  
**Row Name:** Enabling Services  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
WIC funds were underspent during this fiscal year. In addition, the early intervention program sustained a significant cut in funding, and finally the federal earmark awarded by the Administration for Children and Youth designated for the Healthy Families program was underspent.
- 5. Section Number:** Main  
**Field Name:** EnablingExpended  
**Row Name:** Enabling Services  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
As part of the reorganization of the section of maternal-child health, programs for CSHCN as well as pregnant women, infants and children were integrated into Medicaid administration. Thus federal Medicaid funds and other federal streams were utilized to support these efforts reducing the need for use of the significantly reduced general fund dollars. In addition, the WIC program and the Early intervention program which generally represented a large component of the expenditures in enabling services was no longer part of the MCH programs and thus no longer under the direct control of the Title V Director.
- 6. Section Number:** Main  
**Field Name:** PopBasedExpended  
**Row Name:** Population-Based Services  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
The reductions in these areas are the result of the restructuring of DHSS and the distribution of mch programs into five different divisions. Thus the span of control for the programs was significantly reduced as well as the state match towards the federal-state partnership.
- 7. Section Number:** Main  
**Field Name:** InfrastrBuildExpended  
**Row Name:** Infrastructure Building Services  
**Column Name:** Expended  
**Year:** 2003  
**Field Note:**  
Underestimated our budget due to insufficient data from previous years
- 8. Section Number:** Main  
**Field Name:** InfrastrBuildExpended  
**Row Name:** Infrastructure Building Services  
**Column Name:** Expended  
**Year:** 2004  
**Field Note:**  
The reorganization of DHSS resulted in the dismantling of MCH / Title V programs and the redistribution of these programs to five different divisions. Thus the span of control for the MCH program was reduced and the state's contribution of general funds not only changed, but was significantly reduced.

**FORM NOTES FOR FORM 9**

The number of calls was not thoroughly recorded after discontinuing our relationships with AK Info. The number of calls they recieved from 7/1/05 through 1-15-05 was 10 calls. After this time, we began to use the toll free number of (800) 799-7570 which is manned by the a previous MCH staff member who now is in Health Care Services. The approximate number of calls that this number receives is approximately 100 per year. In addition, the EPSDT program has a toll free number (800) 276-0606. This number received a number of call looking for physicians who will take Medicaid, requesting information on services and so on. This number fields aproximately 50-75 call per month. We will continue to use the two numbers in services and manned by the State of Alaska staff.

## FORM NOTES FOR FORM 11

/2006/ For all indicators that did not have available data for 2003 or 2004 where an estimate was required to complete the form, provisional data was used. The provisional data was the estimate from the most recent available year of data. In order to differentiate the provisional estimates from the actual estimates, a manual indicator was entered rather than numerator and denominator data. These will be updated as new data becomes available.

Additional note/ 2006/: #9 National performance measure will not be adjusting this annual performance objective as the state just completed an open mouth survey for this population and found a greater percentage of children had protective sealant than our previous data sources indicated (23%). The annual Performance Objective will stay at 26%. All other performance measures noted in the data alerts were modified.

### FIELD LEVEL NOTES

1. **Section Number:** Performance Measure #1  
**Field Name:** PM01  
**Row Name:**  
**Column Name:**  
**Year:** 2002  
**Field Note:**  
Source: Alaska, MCFH, Special Needs Services Unit. Denominator is Bureau of Vital Statistics CY 2002 occurrent state births. Numerator is number of initial newborn screening tests conducted. Due to late reporting of births to vital statistics we expect the numerator to change as birth reporting becomes more complete later this year.
2. **Section Number:** Performance Measure #1  
**Field Name:** PM01  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
Source: Alaska, MCFH, Special Needs Services Unit.
3. **Section Number:** Performance Measure #1  
**Field Name:** PM01  
**Row Name:**  
**Column Name:**  
**Year:** 2004  
**Field Note:**  
/2006 BG note: The annual performance objective will be increased to 100 percent for the next 5 years as our state program has nearly met 100 for quite some time.
4. **Section Number:** Performance Measure #2  
**Field Name:** PM02  
**Row Name:**  
**Column Name:**  
**Year:** 2002  
**Field Note:**

**25. Section Number:** Performance Measure #9

**Field Name:** PM09

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Alaska Division of Medical Assistance & Department of Labor

Calculated using FFY 01 and FFY 02 incident Medicaid sealants applied to permanent molars of 8 and 9 year olds. This percentage is applied to approximated July 1, 2000 8 and 9 year-old population for 2001 and the July 1, 2001 8 and 9 year population for 2002. Denominators were obtained using 40% of 5-9 year-old Alaska Department of Labor population estimates.

FY 1999 data was updated using revised information from Medicaid services.

- 26. Section Number:** Performance Measure #9  
**Field Name:** PM09  
**Row Name:**  
**Column Name:**  
**Year:** 2003  
**Field Note:**  
Source: Prior to 2005 BG: Alaska Division of Medical Assistance & Department of Labor. Data source has changed to MCH Epidemiology Unit, Dale Williams for the 2005 BG application.
- /2004/ Calculated using FFY 01 and FFY 02 incident Medicaid sealants applied to permanent molars of 8 and 9 year olds. This percentage is applied to approximated July 1, 2000 8 and 9 year-old population for 2001 and the July 1, 2001 8 and 9 year population for 2002. Denominators were obtained using 40% of 5-9 year-old Alaska Department of Labor population estimates. FY 1999 data was updated using revised information from Medicaid services.
- /2005/ Reporting years 2000-2002 have been modified. The new figures reflect the following changes: 1) We are now reporting state fiscal year rather than federal fiscal year. 2) The methodology that was used in previous years was revised using total number of 8-9 year olds receiving protective sealants on at least one permanent molar tooth in the Medicaid database during the state fiscal year, rather than the number receiving this service by mid-year.
- SFY 2003 is provisional. The 2003 population denominator was not available in time for the 2005 BG submission, so 2002 was used as an estimate. This figure will be updated for the 2006 BG.
- 27. Section Number:** Performance Measure #9  
**Field Name:** PM09  
**Row Name:**  
**Column Name:**  
**Year:** 2004  
**Field Note:**  
//BG2006// 1,166 unique children between 8 and 9 years old with dates of service between 7/1/2003 and 6/30/2004 who had sealant applied to permanent molars (teeth 1-3, 14-19, or 30-32). The denominator is 8,122 for Medicaid eligibles. AKDOL population estimates used to obtain the 14.4% of estimated 8 and 9 year olds in Alaska with sealant applied to at least one permanent molar.  
//BG2006//. New open mouth survey conducted in FY05 indicated a significant increase in the percentage of children with dental sealants than what our proxy measure had indicated. Thus the annual performance objective will stay the same /2006/.

2003 is the most recent data available for the 2006 BG application. The estimate of 22.7% for 2004 is provisional and will need to be updated with the 2007 BG application - it is the estimate for 2003.

**79. Section Number:** State Performance Measure #9

**Field Name:** SM9

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Alaska Births Defects Registry, Birth Cohort.

Rates of neural tube defects are reported in 3-year averages. 2002 data (2000-2002) is the most recent data available for 2006 block grant submission.

Counts are for children reported with one of the following neural tube defects: anencephaly, spina bifida, and encephalocele. Children reported with more than one ntd were counted only once

Data previously reported for 1996-98, '97-'99 and '98-2000 needs to be updated due to a methodology change in reporting this indicator. However, due to the limitations of the TVIS application system, the changes cannot be made on-line. The updated rates are as follows:

1998 - 9.0 (comprised of 1996-1998 data)

1999 - 9.0 (comprised of 1997-2000 data)

2000 - 8.7 (comprised of 1998-2000 data)

2001 - 6.7 (comprised of 1999-2001 data)

2003 data will be available for 2007 block grant reporting.

**80. Section Number:** State Performance Measure #9

**Field Name:** SM9

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: Alaska Births Defects Registry, Birth Cohort.

Rates of neural tube defects are reported in 3-year averages. 2002 data (2000-2002) is the most recent data available for 2006 block grant submission. The estimate provided for 2003 is provisional and should be updated with the 2007 BG submission - it is the estimate for 2002.

**81. Section Number:** State Performance Measure #9

**Column Name:**

**Year:** 2004

**Field Note:**

Source: Alaska Bureau of Vital Statistics

Data reported by calendar year expressed in 5 year averages (2003 is comprised of 1999-2003). The most recent data is CY2003, the estimate provided is the estimate for 2003. The 2004 estimate will be available next year and will need to be updated with the 2007 block grant application.

**16. Section Number:** Outcome Measure 6

**Field Name:** OM06

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Alaska Bureau of Vital Statistics

Data is reported by calendar year expressed in five year moving averages. This indicator for CY2002 was updated for BG2006, there was a reporting error with the denominator for CY2000-2002 reporting years due to an error in the population estimate for the 1-14 year age group. Data prior to 2002 can not be corrected through the TVIS system.

**17. Section Number:** Outcome Measure 6

**Field Name:** OM06

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: Alaska Bureau of Vital Statistics

Data is reported by calendar year expressed in five year moving averages.

**18. Section Number:** Outcome Measure 6

**Field Name:** OM06

**Row Name:**

**Column Name:**

**Year:** 2004

**Field Note:**

Source: Alaska Bureau of Vital Statistics

Data reported by calendar year expressed in 5 year averages (2003 is comprised of 1999-2003). The most recent data is CY2003, the estimate provided is the estimate for 2003. The 2004 estimate will be available next year and will need to be updated with the 2007 block grant application.

**19. Section Number:** State Outcome Measure 1

**Field Name:** SO1

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Alaska Bureau of Vital Statistics.

2001 data is most recent for 2004 block grant submission.

In an effort to standardize and develop consistency among age ranges we report on for child mortality indicators, we are proposing that State Outcome Measure #1 "Rate

per 100,000 of fatalities to children between the ages of birth and 19 years due to unintentional injuries" be redefined to "The death rate per 100,000 due to unintentional injuries among children ages 15 through 19."

Inconsistencies in age ranges make the data incomparable with other indicators. Health indicators should be considered not only as stand-alone measures of mortality, but should be viewed in context with other indicators. (For example, we cannot look at the block grant data and say, suicide accounts for more deaths to 15 – 19 year olds than does motor vehicle crashes.) We cannot display or graph block grant indicators on the same graph if age ranges vary by indicator.

The death rate per 100,000 due to unintentional injuries for children between the ages of birth and 19 years would still be discussed in the narrative portion.

**20. Section Number:** State Outcome Measure 2

**Field Name:** SO2

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Alaska Bureau of Vital Statistics.

Data reported by calendar year expressed in three year moving averages.

Measure was changed in 2001 from death rate per 100,000 for children birth through age 19 years in 2003 block grant application to death rate per 100,000 for children aged 15 through 19 years to allow comparability with other indicators.

CY1999-2001 are not grouped correctly into 3 year averages. The estimates for those years are not correct. They are as follows:

CY99 - 44.3 (N=63, D=142216)

CY00 - 50.6 (N=74, D=146135)

CY01 - 51.3 (N=77, D=150104)

**21. Section Number:** State Outcome Measure 2

**Field Name:** SO2

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: Alaska Bureau of Vital Statistics.

Data reported by calendar year expressed in three year moving averages.

Measure was changed in 2001 from death rate per 100,000 for children birth through age 19 years in 2003 block grant application to death rate per 100,000 for children aged 15 through 19 years to allow comparability with other indicators.

**22. Section Number:** State Outcome Measure 2

### FIELD LEVEL NOTES

- 1. Section Number:** Main  
**Field Name:** Question1  
**Row Name:** #1. Family members participate on advisory committee or task forces...  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Family members are an active component of the Newborn Metabolic Advisory committee and the Early Hearing Detection Committee. In addition, the Stone Soup group, a parent advocacy and navigation non-profit is a grantee to provide parent navigation services statewide for families with infants and children seen or known to have cleft lip and palates. The parent navigators responsible for this grant both have children who were born with cleft lips and palates. Plans are underway to contract for similar services for children with hearing loss or deafness statewide and children with severe neurological problems who reside in Fairbanks and rural areas.
- 2. Section Number:** Main  
**Field Name:** Question2  
**Row Name:** #2. Financial support (...) is offered for parent activities or parent groups.  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Through the stone soup group, technical assistance-parent navigation assistance specifically is offered. In addition, the specialty clinics for neurodevelopmental, neurology, cleft lip and palate, genetics and birth defects and newborn metabolic disorders are all offered on a sliding fee schedule for those families without health insurance or Medicaid. Many times the parent navigation services will work with services organizations in the family's community to fund travel or equipment for those who have not insurance. In addition, funds are set aside for critical cases to assist families when no other resources are available.
- 3. Section Number:** Main  
**Field Name:** Question3  
**Row Name:** #3. Family members are involved in the Children with Special Health Care Needs...  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Families who are active the aforementioned committees are offered an opportunity to review the block grant application. More importantly, however, because of their ongoing presence and activities, their input is requested and included in decisions made throughout the year regarding the programs funded by the MCH block grant as well as those funded by other sources.
- 4. Section Number:** Main  
**Field Name:** Question5  
**Row Name:** #5. Family members hired as paid staff or consultants to the State CSHCN program...  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Again due to our work with the Stone Soup Group, the Family Action Council at the Children's Hospital at Providence, Family Voices-Alaska Chapter and the various committee named earlier, families play an integral part in the services delivered by our programs. They are formally hired via the Stone Soup group grant for their expertise. We look forward to expanding this relationship to focus on other specialties.

**FORM 14**  
**LIST OF MCH PRIORITY NEEDS**

[Sec. 505(a)(5)]

**STATE: AK FY: 2006**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce rate of drug use among families, primarily alcohol intake and cigarette use.
2. Reduce the rate of child abuse and neglect.
3. Increase public awareness and access to health care services for children and CSHCN.
4. Reduce the rate of unplanned and unwanted pregnancies (including teen pregnancy).
5. Increase access to dental health services for children.
6. Reduce the rate of domestic violence.
7. Reduce the rate of post-neonatal mortality.
8. Reduce the rate of teen suicide.
9. Reduce the prevalence of childhood obesity and overweight.
10. Increase awareness around mental health issues in the MCH population.

**FORM NOTES FOR FORM 15**

None

**FIELD LEVEL NOTES**

None

**FORM 16**  
**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: AK**

SP # 1

**PERFORMANCE MEASURE:**

Percentage of Unintended Births

**STATUS:**

Active

**GOAL**

To reduce unintended births to Alaska-resident women

**DEFINITION**

For a particular calendar year of the resulting live birth: The number of women who indicated, postpartum, that just before getting pregnant, they wanted to be pregnant either later or never. (Numerator) The total number of Alaska-resident women who had a live birth (Denominator)

**Numerator:**

For a particular calendar year of the resulting live birth: The number of women who indicated, postpartum, that just before getting pregnant, they wanted to be pregnant either later or never.

**Denominator:**

The total number of Alaska-resident women who had a live birth.

**Units:** 100 **Text:** 1

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska PRAMS (II: Q7, III: Q5) Limitations: Only measures "intention" for pregnancies resulting in live births -- not those that were terminated. PRAMS measures data by calendar year

**SIGNIFICANCE**

In Alaska, 42% of births are unintended resulting in a personal and financial burden for Alaskan families as well as the welfare system. 55% of births to Medicaid families are unintended. Each unintended birth costs the welfare system approximately \$31,185 for the prenatal care and infant care during the first year of life. 61% of women who had an unintended pregnancy were not using any method of contraception at the time of conception. Increasing access to family planning services is a critical component in reducing unintended births.

SP # 2

**PERFORMANCE MEASURE:**

Rate of substantiated reports of harm to children per thousand children age 0 to 18.

**STATUS:**

Active

**GOAL**

To reduce the number of children and teenagers who experience child abuse and neglect

**DEFINITION**

The number of children who have a substantiated report of abuse and neglect (Numerator) The number of all children between birth and 18 years living in Alaska (Denominator)

**Numerator:**

The number of children who have a substantiated report of abuse and neglect

**Denominator:**

The number of all children between birth and 18 years living in Alaska

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska Division of Family and Youth Services

**SIGNIFICANCE**

The 1995 Edition of "Child Abuse and Neglect: A Look at the States," reported in 1993, Alaska led the nation in substantiated/indicated child maltreatment in physical abuse, neglect and sexual abuse. Child abuse and neglect have short and long term consequences lasting a lifetime. Efforts must be directed toward preventing child abuse and neglect and when it does occur, assuring early intervention and support services for the child.

SP # 3

**PERFORMANCE MEASURE:**

Percentage of Women Who Smoke Prenatally.

**STATUS:**

Active

**GOAL**

To reduce the number of women who smoke prenatally.

**DEFINITION**

For a particular calendar year of the resulting live birth: The number of women who smoked cigarettes during the third trimester of the pregnancy (Numerator) The total number of Alaska-resident women who had a live birth (Denominator)

**Numerator:**

For a particular calendar year of the resulting live birth: The number of women who smoked cigarettes during the third trimester of the pregnancy

**Denominator:**

The total number of Alaska-resident women who had a live birth (Denominator)

**Units:** 100 **Text:** percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska PRAMS (II: Q29, III: Q23) Limitations: Only measures for pregnancies resulting in live births, only asks about cigarette use during the last three months of pregnancy.

**SIGNIFICANCE**

Maternal smoking during pregnancy is associated with increased infant morbidity and mortality especially as it relates to preterm and low birth weight infants. Maternal smoking during pregnancy may result in a lower birth weight, spontaneous abortion, or other serious complications of pregnancy. Mothers who smoke throughout pregnancy usually have infants that weigh between 150 to 300 grams less than non-smoking mothers. Based on Alaska smoking rates, research reported by the U.S. Surgeon General indicates that 5% of perinatal deaths, 20% of low birth-weight babies, and 8% of pre-term deliveries could be avoided annually in Alaska if maternal smoking were eliminated.

SP # 4

**PERFORMANCE MEASURE:**

Percentage of Women Who Drink Prenatally.

**STATUS:**

Active

**GOAL**

To reduce the number of women who drink during pregnancy.

**DEFINITION**

For a particular calendar year of the resulting live birth: The number of women who drank alcohol during the third trimester of the pregnancy (Numerator) The total number of Alaska-resident women who had a live birth (Denominator)

**Numerator:**

For a particular calendar year of the resulting live birth: The number of women who drank alcohol during the third trimester of the pregnancy (Numerator)

**Denominator:**

The total number of Alaska-resident women who had a live birth (Denominator)

**Units:** 100 **Text:** percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska PRAMS (II: Q32, III: Q26) Limitations: Only measures for pregnancies resulting in live births, only asks about alcohol use during the last three months of pregnancy.

**SIGNIFICANCE**

Prenatal exposure to alcohol is associated with a wide range of infant outcomes from Fetal Alcohol Syndrome (FAS) to very subtle effects. FAS could be among the most common preventable causes of mental retardation in the U.S.

SP # 5

**PERFORMANCE MEASURE:**

Percentage of Women Experiencing Physical Abuse by Husbands/Partners Surrounding Prenatal Period

**STATUS:**

Active

**GOAL**

To reduce the number of women who are physically abused by their husbands or partners surrounding the prenatal period.

**DEFINITION**

For a particular calendar year of the resulting live birth: The number of women who were physically abused by their husbands/partners 12 months before the pregnancy or during the pregnancy. (Numerator) The total number of Alaska-resident women who had a live birth (Denominator)

**Numerator:**

For a particular calendar year of the resulting live birth: The number of women who were physically abused by their husbands/partners 12 months before the pregnancy or during the pregnancy. (Numerator)

**Denominator:**

The total number of Alaska-resident women who had a live birth. (Denominator)

**Units:** 100 **Text:** percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska PRAMS (II: Q33g, III: Q32-3) Limitations: Population limited to women who were pregnant and had a live birth.

**SIGNIFICANCE**

Domestic violence in Alaska is most likely perpetrated by the woman's legal spouse (over 70%), common-law spouse, or live-in partner. Children of abused women are often also abused by the perpetrator. Physical abuse of some kind is estimated to affect over 19,000 women per year in Alaska. Physical abuse of women (around the time of pregnancy) by their partners has been linked to an increased likelihood of many adverse outcomes: fetal injury, infant and child abuse; increased isolation of the mother and a reduced number of prenatal care visits.

SP # 6

**PERFORMANCE MEASURE:**

Percentage of Mothers Putting Infant Down to Sleep in the Supine Position (On Their Backs)

**STATUS:**

Active

**GOAL**

To reduce Sudden Infant Death Syndrome deaths.

**DEFINITION**

For a particular calendar year of the resulting live birth: The number of women who indicated they most regularly put their infant down to sleep on his/her back. (Numerator) The total number of Alaska-resident women who had a live birth. (Denominator)

**Numerator:**

For a particular calendar year of the resulting live birth: The number of women who indicated they most regularly put their infant down to sleep on his/her back.

**Denominator:**

The total number of Alaska-resident women who had a live birth (Denominator)

**Units:** 100 **Text:** percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska PRAMS (III: Q45)

**SIGNIFICANCE**

Numerous studies have demonstrated that placing infants on their backs greatly reduces the risk of Sudden Infant Death Syndrome (SIDS).

SP # 7

**PERFORMANCE MEASURE:**

Percentage of people experience intimate partner violence during their lifetime.

**STATUS:**

Active

**GOAL**

To reduce the number of people who experience domestic violence by their partners

**DEFINITION**

Alaskans who experience intimate partner violence.

**Numerator:**

Number of Alaskans aged 18 and older who have experienced intimate partner violence.

**Denominator:**

Total Alaskans aged 18 and older.

**Units:** 100 **Text:** percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Provider Survey developed and administered by MCFH

**SIGNIFICANCE**

Domestic violence (DV) is the leading cause of injury and homicide for women and is associated with numerous chronic health effects. DV is the leading identifiable factor in child abuse. DV is a major barrier in prenatal care, the decision to breastfeed, teenage pregnancy, sexually transmitted diseases, and unplanned pregnancies. Early identification and intervention for DV can break the cycle of violence for women and their children. DV is a learned behavior. Children who grow up in violent households are more likely to become perpetrators and suffer from numerous physical and behavioral consequences.

SP # 8

**PERFORMANCE MEASURE:**

Percentage of People Who Eat Five or More Daily Servings of Vegetables and Fruits

**STATUS:**

Active

**GOAL**

To increase the percentage of people who eat five or more daily servings of vegetables and fruits.

**DEFINITION**

The number of people who eat five or more daily servings of vegetables and fruits in BRFSS survey. (Numerator) The total number of people in BRFSS (weighted to represent Alaska population)

**Numerator:**

The number of people who eat five or more daily servings of vegetables and fruits in BRFSS survey.

**Denominator:**

The total number of people in BRFSS (weighted to represent Alaska population)

**Units:** 100 **Text:** percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

BRFSS Limitation: Fruit and vegetable consumption questions are part of the rotating core questions and are surveyed every other year

**SIGNIFICANCE**

Diet and nutrition play a significant role in the development or prevention of for of the top ten leading causes of death in Alaska and the U.S. current studies show that a diet high in fruits and vegetables can reduce the risk of certain cancers, heart disease, diabetes and stroke.

SP # 9

**PERFORMANCE MEASURE:**

The prevalence at Birth of Neural Tube Defects per 10,000 live births

**STATUS:**

Active

**GOAL**

To reduce the prevalence at birth of neural tube defects (NTDs)

**DEFINITION**

Number of cases of NTDs ascertained from the Birth Defects Registry and related resources in a reporting year (Numerator)  
All live births in the state in a reporting year (Denominator)

**Numerator:**

Number of cases of NTDs ascertained from the Birth Defects Registry and related resources in a reporting year

**Denominator:**

All live births in the state in a reporting year

**Units:** 10000 **Text:** rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska Vital Statistics is the reporting source for number of live births The Birth Defects Registry will provide data on the number of children born with NTDs Neural Tube Defects are among the most common birth defects contributing to significant infant morbidity and mortality in the U.S. One half to two-thirds of NTDs may be prevented by the daily use of folic acid supplementation in women of reproductive age. It is estimated that the recurrence of NTDs may be up to 70% preventable by daily folic acid supplementation. Preventing NTDs through public health interventions can significantly reduce mortality and morbidity in Alaska's babies and children.

**SIGNIFICANCE**

SP # 10

**PERFORMANCE MEASURE:**

Percentage of high school youth who feel supported at school

**STATUS:**

Active

**GOAL**

To increase the number of adolescents who are living healthy lifestyles and making positive choices by remaining abstinent from sexual activity, alcohol and drugs.

**DEFINITION**

.Number of students who answer that they feel supported at school on special surveys conducted in school settings.

**Numerator:**

Number of students who answer that they feel supported at school.

**Denominator:**

Total number of students surveyed.

**Units:** 100   **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Adolescent Health Program

**SIGNIFICANCE**

National research from the Search Institute has shown the more developmental assets kids have the less likely they are to be engaged in sexual activity, alcohol and drug use. In addition, adolescents with a greater number of assets are more likely to be involved in helping others, doing well in school and maintaining good health.

SO # 2

**OUTCOME MEASURE:**

Death rate per 100,000 due to unintentional injuries among children 15 through 19 years.

**STATUS:**

Active

**GOAL**

To reduce the number of children and teenagers who die in Alaska from injuries from unintentional causes such as motor vehicle crashes, playground injuries, gunshots, dog maulings, falls, choking, poisoning, etc.

**DEFINITION**

Numerator: The number of children ages 15 through 19 years who die of unintentional injuries in Alaska. Denominator: The number of all children ages 15 through 19 years. All data reported as three year moving averages.

**Numerator:**

The number of children ages 15 through 19 years who die of unintentional injuries in Alaska.

**Denominator:**

The number of children ages 15 through 19 years in Alaska.

**Units:** 100000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Bureau of Vital Statistics; the Maternal and Infant Morbidity and Mortality Committee; and the Child Fatality Review Committee.

**SIGNIFICANCE**

Alaska is the most dangerous state in the country for children and teenagers. This is according to the latest report from the Johns Hopkins Center for Injury Research and Policy. From 1986-1992, the injury death rate for Alaskans from birth through age 19 was 45.7 per 100,000. Although improved over the previous six year rate of 55.6 deaths per 100,000, Alaska's injury death rate among children and youth still ranked first in the nation and was 50% greater than the national rate of 30.2 per 100,000 (Injury to Children and Teenagers, State-by-State Mortality Facts, S.P. Baker, et al).

## FORM NOTES FOR FORM 17

None

### FIELD LEVEL NOTES

**1. Section Number:** Health Systems Capacity Indicator #01

**Field Name:** HSC01

**Row Name:**

**Column Name:**

**Year:** 2002

**Field Note:**

Source: Alaska Division of Medical Assistance.

Data reported by Fiscal Year. SFY 2001 data is the most recent available for 2004 block grant submission.

2000 numerator and denominator values have been updated for 2004 Block Grant. 2000 and 2001 data is derived from number of Medicaid eligible children who were hospitalized for Asthma during FFY 2000 and 2001. Denominator values for 2000 and 2001 are estimates for Medicaid eligible children <5 years of age. Data does not include all children in this age-group hospitalized for Asthma in Alaska.

Statewide surveillance of Asthma is not possible at this time as hospital inpatient, discharge data other than Medicaid billing is not collected in a centralized database.

/2003/Updated numbers for FY1999 old numbers are as follows n=246 and d=10941.

The measures given for both 1998 and 1999 are derived from medicaid data on the number of hospitalizations for asthma per 10,000 Medicaid eligibles under age five. The 1998 figure covers CY1998 and numerator data was provided directly from Medicaid. The 1999 figures covers SFY1999 and the numerator was obtained through MCFH analysis of in-patient Medicaid files.

HSI#01: Includes Medicaid children only. Rate reflects 123 unduplicated children that were hospitalized for asthma not the number of hospitalizations Data for SFY 7/1/99 - 6/30/00./2003//

**2. Section Number:** Health Systems Capacity Indicator #01

**Field Name:** HSC01

**Row Name:**

**Column Name:**

**Year:** 2003

**Field Note:**

Source: MCH Epidemiology - Dale Williams.

HSCI #1 /2005/ The methodology to determine the rate of children hospitalized for asthma was revised for the 2005 BG application. Reporting periods SFY2000-2003 have been revised to reflect this change, note that 1998 and 1999 used a different methodology. Point in time estimates for denominator values were replaced with complete counts of children who were less than 5 years of age during the reporting period. Also, previously reported values appear to have included children through age 5, rather than up to age 5. The reporting period has been changed from calendar year to state fiscal year.

### FIELD LEVEL NOTES

1. **Section Number:** Indicator 06 - Medicaid  
**Field Name:** Med\_Infant  
**Row Name:** Infants  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
The percent of poverty for infants ages 0 to 1 to be eligible for Medicaid is up to and including 150%.
2. **Section Number:** Indicator 06 - Medicaid  
**Field Name:** Med\_Children  
**Row Name:** Medicaid Children  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
The percent of poverty for children ages 1 to 19 to be eligible for Medicaid is up to and including 150%.
3. **Section Number:** Indicator 06 - Medicaid  
**Field Name:** Med\_Women  
**Row Name:** Pregnant Women  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
For pregnant women, for the period October 1, 2002 - August 31, 2003 the FPL upper guideline was 200%. Effective September 1, 2003, the FPL upper guideline for pregnant women was lowered to 175%, and frozen at the 2003 FPL guideline standard, meaning that the FPL guidelines no longer increase with adjustments for inflation each year. The percent of poverty level for pregnant women to be eligible for Medicaid is approximately 170%.
4. **Section Number:** Indicator 06 - SCHIP  
**Field Name:** SCHIP\_Infant  
**Row Name:** Infants  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
The percent of poverty for infants ages 0 to 1 to be eligible for SCHIP is approximately 170%.
5. **Section Number:** Indicator 06 - SCHIP  
**Field Name:** SCHIP\_Children  
**Row Name:** SCHIP Children  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
The percent of poverty for children ages 1 to 19 to be eligible for SCHIP is approximately 170%.
6. **Section Number:** Indicator 06 - SCHIP  
**Field Name:** SCHIP\_Women  
**Row Name:** Pregnant Women  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
SCHIP in Alaska does not cover pregnant women. Medicaid covers pregnant women up to 200% of Federal poverty level.
7. **Section Number:** Indicator 05  
**Field Name:** InfantDeath  
**Row Name:** Infant deaths per 1,000 live births  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Data Source: Alaska Bureau of Vital Statistics

In the process of obtaining 10 remaining death certificates to complete the match. This will be completed before 2006 BG submission. The current data are estimates based on 2002 data and used for place holder data only.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: AK**

**HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)**  
*(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)*

<b>DATABASES OR SURVEYS</b>	<b>Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *</b>	<b>Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)</b>
<b>ANNUAL DATA LINKAGES</b>		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	1	No
Annual linkage of birth certificates and newborn screening files	3	Yes
<b>REGISTRIES AND SURVEYS</b>		
Hospital discharge survey for at least 90% of in-State discharges	3	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

\*Where:

1 = No, the MCH agency does not have this ability.

2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.

3 = Yes, the MCH agency always has this ability.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: AK**

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other:		

**HEALTH SYSTEMS CAPACITY INDICATOR #09C (Data Capacity) Overweight/Obesity**  
*(The Ability of the State to Determine the Percent of Children Who are Obese or Overweight)*

Data Source	Does your state participate in this survey/data source? (Select 1 - 3)*	Does your MCH program have direct access to this electronic database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Pediatric Nutrition Surveillance System (PedNSS)	1	No
WIC Program Data	3	Yes
Other:		
School District Data		No

\*Where:  
1 = No  
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.  
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

**Notes:**

1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

## FORM NOTES FOR FORM 19

None

### FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A

**Field Name:** Discharge

**Row Name:** Hospital discharge survey for at least 90% of in-State discharges

**Column Name:**

**Year:** 2006

**Field Note:**

The Alaska Hospital Inpatient Discharge Database is estimated to represent 88% of statewide hospitalizations for the most recent available data (2003). The tribal hospitals other than ANMC are not in the database at this time. Bassett Army Hospital and API are not included in the database.

2. **Section Number:** Indicator 09C

**Field Name:** Other1\_09C

**Row Name:** Other

**Column Name:**

**Year:** 2006

**Field Note:**

School District Data: the Anchorage school district collects heights, weights, and age data on students in the system. Recently, there was a collaboration of ASD and the Alaska DHSS, Section of Epidemiology to analyze this data to get prevalence and trend information on overweight/obesity among children in Alaska. This is a potential data source that may be used in the future.

## FORM NOTES FOR FORM 21

None

### FIELD LEVEL NOTES

1. **Section Number:** Indicator 09A  
**Field Name:** HSIRace\_SingleParentPercent  
**Row Name:** Percent in household headed by single parent  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Data Source: Census 2000. SF1 P28A-P28G  
  
Census 2000 data is the most recent available for the BG2006 application.
2. **Section Number:** Indicator 09A  
**Field Name:** HSIRace\_TANFPercent  
**Row Name:** Percent in TANF (Grant) families  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
There were 879 children ages 0-19 that were of 'Unknown or Other Race', however, denominator data is not available through Alaska DOL for this race category. They are included in the 'Total all Races' category.
3. **Section Number:** Indicator 09A  
**Field Name:** HSIRace\_MedicaidNo  
**Row Name:** Number enrolled in Medicaid  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Data Source: Medicaid request from Health Care Services  
  
Hispanic are included in 'other and unknown'.
4. **Section Number:** Indicator 09A  
**Field Name:** HSIRace\_JuvenileCrimeRate  
**Row Name:** Rate (per 100,000) of juvenile crime arrests  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
There were 201 children ages 0-19 that were of 'Unknown or Other Race', however, denominator data is not available through Alaska DOL for this race category. They are included in the 'Total all Races' category.
5. **Section Number:** Indicator 09A  
**Field Name:** HSIRace\_DropOutPercent  
**Row Name:** Percentage of high school drop-outs (grade 9 through 12)  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Data Source: DEED  
  
Counts for estimating 'Asian' and 'Native Hawaiian or Other Pacific Islander' are combined.  
  
All individuals are assigned a race category, 'Other and Unknown' category does not apply.
6. **Section Number:** Indicator 09B  
**Field Name:** HSIEthnicity\_SingleParentPercent  
**Row Name:** Percent in household headed by single parent  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Data Source: Census 2000. SF1 P28A-P28G  
  
Census 2000 data is the most recent available for the BG2006 application.
7. **Section Number:** Indicator 09B  
**Field Name:** HSIEthnicity\_JuvenileCrimeRate  
**Row Name:** Rate (per 100,000) of juvenile crime arrests  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
Data Source: Department of Juvenile Justice  
  
The number of children ages 0-19 in the category 'Ethnicity Not Reported' is 6561. Denominator data comes from the Alaska DOL, from this data source Hispanic is counted as a race group rather than ethnicity. Since a race assignment is made, there are no 'unknown' race individuals from this data source so this category cannot be calculated.
8. **Section Number:** Indicator 10  
**Field Name:** Metropolitan  
**Row Name:** Living in metropolitan areas  
**Column Name:**  
**Year:** 2006  
**Field Note:**  
The percent of population living in Urban/Rural areas are from the 2000 Census (SF1 table PCT2). The 2004 Total Pop and 0-19 age group estimates are from the Alaska DOL. Percents from total population living in each area was applied to the 2004 0-19 age group for a rough estimate of children ages 0-19 living in MSA, Urban, and Rural areas of Alaska. Alaska does not have readily available estimates for this demographic information. Currently, cross-tabulations from census data are not available for urban/rural by age.  
  
\*Metropolitan Areas in Alaska are Anchorage and Fairbanks North Star Borough which are our only designated Urban Areas.  
  
Estimates for children living in 'Frontier' areas are not available for the BG2006 application.
9. **Section Number:** Indicator 10  
**Field Name:** Urban  
**Row Name:** Living in urban areas

**Column Name:****Year:** 2006**Field Note:**

The percent of population living in Urban/Rural areas are from the 2000 Census (SF1 table PCT2). The 2004 Total Pop and 0-19 age group estimates are from the Alaska DOL. Percents from total population living in each area was applied to the 2004 0-19 age group for a rough estimate of children ages 0-19 living in MSA, Urban, and Rural areas of Alaska. Alaska does not have readily available estimates for this demographic information. Currently, cross-tabulations from census data are not available for urban/rural by age.

Estimates for children living in 'Frontier' areas are not available for the BG2006 application.

**10. Section Number:** Indicator 10**Field Name:** Rural**Row Name:** Living in rural areas**Column Name:****Year:** 2006**Field Note:**

**12. Section Number:** Indicator 12**Field Name:** S12\_Children**Row Name:** Children 0 through 19 years old**Column Name:****Year:** 2006**Field Note:**

Data Source: U.S. Census Bureau 2000 Census

This estimate is for children under age 18 and does not include 18 and 19 year olds. Alaska obtains poverty estimates from the census and 2000 data is the most recent available at the time of the BG2006 submission.

**13. Section Number:** Indicator 09A**Field Name:** HSIRace\_FosterCare**Row Name:** Number living in foster home care**Column Name:****Year:** 2006**Field Note:**

Data Source:

Counts for 'Asian' and 'Native Hawaiian or Other Pacific Islander' are combined. This data system does not distinguish these two groups separately.

These are point-in-time counts occurring on September 1, 2004.

**NEW STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: AK**

SP # 1

**PERFORMANCE MEASURE:**

Percentage of mothers of newborns who say their physician or health plan would not start prenatal care as early as they wanted or they could not get an appointment as early as they wanted.

**GOAL**

To ensure early entrance into prenatal care to enhance pregnancy outcomes.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who wanted prenatal care and reported that their doctor or health plan would not start prenatal care as early as they wanted or they could not get an appointment as early as they wanted.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who wanted prenatal care.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-16a

Increase the proportion of pregnant women who receive early and adequate prenatal care beginning in the first trimester of pregnancy to 90%.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Early identification of maternal disease and risks for complications of pregnancy or birth are the primary reason for first trimester entry into prenatal care. Alaska PRAMS data has shown that 1 in 5 women did not get prenatal care as early as they wanted. Reported barriers to receiving prenatal care as early as they wanted included, 'couldn't get an appointment earlier' (28.6%) and 'doctor or health plan would not start earlier' (13.8%).

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 2

**PERFORMANCE MEASURE:**

Percent of women who smoked during the last 3 months of pregnancy among women who smoked 3 months prior to pregnancy and were talked to about the effects of smoking by a prenatal health care provider.

**GOAL**

To reduce the number of women who smoke prenatally.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they smoked 3 months prior to pregnancy and had been talked to about the effects of prenatal smoking by a prenatal health care provider and reported that they also smoked during the last 3 months of pregnancy.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they smoked 3 months prior to pregnancy and had been talked to about the effects of prenatal smoking by a prenatal health care provider.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-17c

Increase the proportion of women who abstain from cigarette smoking during pregnancy to at least 99%.

Related to Objective 1-3b

Increase counseling about smoking cessation (among population, not just pregnant women).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Maternal smoking during pregnancy is associated with increased infant morbidity and mortality especially as it relates to preterm and low birth weight infants. Maternal smoking during pregnancy may result in a lower birth weight, spontaneous abortion, or other serious complications of pregnancy. Mothers who smoke throughout pregnancy usually have infants that weigh between 150 to 300 grams less than non-smoking mothers. Based on Alaska smoking rates, research reported by the U.S. Surgeon General indicates that 5% of perinatal deaths, 20% of low birth-weight babies, and 8% of pre-term deliveries could be avoided annually in Alaska if maternal smoking were eliminated.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 3

**PERFORMANCE MEASURE:**

Percentage of children ages 10-11 who are at-risk for being overweight.

**GOAL**

To reduce the percentage of children who are overweight and at-risk for being overweight.

**DEFINITION**

**Numerator:**

Number of children who are at-risk for being overweight as defined by NCHS BMI classification.

**Denominator:**

Total number of children ages 10-11 in Alaska.

**Units:**   **Text:** 0

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 19-3a-c

Reduce the proportion of children who are obese or overweight to 5% or less.

**DATA SOURCES AND DATA ISSUES**

Centers for Disease Control and Prevention. National Survey of Child Health. This survey is not conducted on a yearly basis.

**SIGNIFICANCE**

A recent report from the Institute of Medicine estimates that approximately nine million children over six years of age are currently obese. In Alaska, over the last two decades, the prevalence of overweight among children ages 6-11 years has more than doubled, increasing from 7% in 1980 to 15% in 2000. Overweight among adolescents ages 12-19 years has tripled during the same time period – from 5% to 15%. In addition, recent analysis of Anchorage School District data showed that more than one-third of the students assessed were overweight or at-risk of overweight.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 4

**PERFORMANCE MEASURE:**

Rate of substantiated reports of harm per thousand children ages 0 through 18.

**GOAL**

To reduce the number of children and teenagers who experience child abuse and neglect

**DEFINITION**

**Numerator:**

The number of children who have a substantiated report of abuse and neglect.

**Denominator:**

The number of all children between birth and 18 years living in Alaska.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska Division of Family and Youth Services

**SIGNIFICANCE**

The 1995 Edition of "Child Abuse and Neglect: A Look at the States," reported in 1993, Alaska led the nation in substantiated/indicated child maltreatment in physical abuse, neglect and sexual abuse. Child abuse and neglect have short and long term consequences lasting a lifetime. Efforts must be directed toward preventing child abuse and neglect and when it does occur, assuring early intervention and support services for the child.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 5

**PERFORMANCE MEASURE:**

Percentage of women who recently had a live-born infant who reported their prenatal health care provider advised them not to drink alcohol during their pregnancy.

**GOAL**

To reduce the number of women who drink prenatally.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they had received prenatal care and had been advised not to drink alcohol by their prenatal health care provider.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they had received prenatal care.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-17a

Increase the proportion of women who abstain from drinking alcohol during pregnancy to at least 96%.

Related to Objective 1-3c

Increase counseling about reduced alcohol consumption (entire population, not just pregnant women).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Prenatal exposure to alcohol is associated with a wide range of infant outcomes from Fetal Alcohol Syndrome (FAS) to very subtle effects. FAS is the most common preventable cause of mental retardation in the U.S. In a recent advisory on alcohol use during pregnancy, the Surgeon General recommended that health professionals regularly ask women of childbearing age about alcohol use and to inform them of the risks of drinking alcohol during pregnancy. It is further recommended that they advise them not to drink alcohol during pregnancy. In Alaska during 2002, a survey of FAS Knowledge, Attitudes, Beliefs and Behaviors (KABB) found that 36% of obstetrician/gynecologists responded that it was OK for a pregnant woman to drink alcohol occasionally, more than double the percent of either Pediatricians or Family Physicians. However, over 90% of physicians strongly agreed that FAS is preventable.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 6

**PERFORMANCE MEASURE:**

Prevalence of unintended pregnancies that resulted in a live birth among women who reported having a controlling partner during the 12 months prior to getting pregnant.

**GOAL**

To reduce the number of unintended pregnancies.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that their pregnancy was unintended (either mistimed or unwanted) and that they had a controlling partner (i.e. husband or partner threatened her, limited her activities against her will, or made her feel unsafe in any other way) during the 12 months prior to getting pregnant.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they had a controlling partner during the 12 months prior to getting pregnant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objective 9-1

Increase the percentage of women who have an intended pregnancy to at least 70% (all pregnancies, not just those resulting in a live-birth).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

In Alaska, PRAMS 2002 data showed that 45.3% of births were unintended resulting in a personal and financial burden for Alaskan families as well as the welfare system. 58.4% of births to women receiving prenatal care paid by Medicaid were unintended. Each unintended birth costs the welfare system approximately \$31,185 for the prenatal care and infant care during the first year of life. Increasing access to family planning services is a critical component in reducing unintended births.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 7

**PERFORMANCE MEASURE:**

Percentage of women who recently had a live-born infant who reported that they always or often felt down, depressed, or hopeless since their new baby was born.

**GOAL**

To reduce the number of women experiencing post-partum depression (need to look up HP2010, see note below) .

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they always or often felt down, depressed, or hopeless since their new baby was born.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objective 16-5c

Reduce the number of hospitalizations for post-partum complications, including depression. This is a developmental objective.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Alaska PRAMS 2002 data showed that 4.7% of Alaskan women delivering a live-birth reported they were very depressed and 14.5% reported they were moderately depressed. More than half (51.9%) reported they experienced low to moderate depression. Among women who self-reported postpartum depression (56.6%), more than 1 in 5 indicated they wanted to see a mental health professional and 1 in 8 had not seen one.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 8

**PERFORMANCE MEASURE:**

Prevalence at birth of Fetal Alcohol Spectrum Disorders (FASD).

**GOAL**

To reduce the prevalence of Fetal Alcohol Spectrum Disorders (FASD).

**DEFINITION**

**Numerator:**

Number of reported cases of Fetal Alcohol Spectrum Disorders (FASD) during a consecutive three-year time period.

**Denominator:**

Total number of Alaska-resident live births during a consecutive three-year time period.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

Relates to Objective 16-18

Reduce Fetal Alcohol Syndrome (FAS). This is a developmental objective.

**DATA SOURCES AND DATA ISSUES**

Alaska Bureau of Vital Statistics is the reporting source for the number of live births. Data on the number of children born with Fetal Alcohol Spectrum Disorders will be provided based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry. Due to the small number of annual events that occur in Alaska, rates are presented in three-year moving averages.

**SIGNIFICANCE**

Fetal Alcohol Spectrum Disorders are 100% preventable if a woman does not consume alcoholic beverages during pregnancy. Many children with FASDs do not catch up with their peers or outgrow their disabilities and many of these problems may not be identified at birth or become obvious until the child reaches school age or later. The 1996-1998 Alaska prevalence for FAS was 1.6 per 1,000 live births. The Alaska Fetal Alcohol Syndrome Surveillance Project estimates that 163 children are born each year with effects of maternal drinking during pregnancy that may fall across the FASD continuum.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

**PERFORMANCE MEASURE:**

Percentage of infants who are reported to have a Cleft Lip/Palate defect who access the Title V sponsored Cleft Lip and Palate Specialty Clinic within the first year of life.

**GOAL**

Increase access to health care services to CSHCN.

**DEFINITION****Numerator:**

Number of Alaskan children from birth to age 1 that were reported to have a Cleft Lip/Palate defect and accessed the Cleft Lip and Palate Specialty Clinic.

**Denominator:**

Number of Alaskan children from birth to age age 1 that were reported to have a Cleft Lip/Palate defect.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objectives 16-23 and 21-15

These Objectives are related to increasing service systems to CSHCN and increasing recording and referral of children and youth with cleft lip/palate.

**DATA SOURCES AND DATA ISSUES**

Alaska Birth Defects Registry and the Alaska Cleft Lip and Palate Specialty Clinic Program. Not all diagnoses occur between the ages of birth and one year. Submucous cleft palates (those covered by the mucous membrane over the roof of the mouth) may be identified when children are older and develop abnormally nasal speech. Some families do not participate in state-sponsored Cleft Lip and Palate Specialty Clinics even though they have been referred to the clinics. Instead they choose to seek medical care out of state for a variety of reasons (to be near extended family, to access a Craniofacial center closer to their homes than the nearest state-sponsored clinic, to remain within the military healthcare system, or to address other major health problems that cannot be treated at facilities within the state). In addition some children who have cleft palates in conjunction with other life-threatening conditions do not survive long enough to participate in state-sponsored clinics.

**SIGNIFICANCE**

For the 5-year period 1998-2002, the rate of oral cleft among Alaskan children was 3.1 per 1,000 population – nearly 3 times higher than the national rate of 1.2 per 1,000 population. During this same period the rate of oral cleft was nearly 2 times as high among Alaska Native children as white children – 5.0 and 2.7 per 1,000 population, respectively. Early specialty care is necessary in order for these infants to thrive and remain healthy, and it provides an opportunity to educate parents about a condition that often is unfamiliar to them. Because children with clefts require many types of services over a period of years, their care must be coordinated. Specialty clinics offer a multidisciplinary approach and include providers such as plastic surgeons, speech therapists, audiologists, ear-nose-throat specialists, pediatric dentists, orthodontists, oral surgeons, pediatricians, and dietitians. This team of providers assures quality and continuity of care along with long-term follow-up that results in optimal outcomes for patients. Without treatment, these children are subject to poor weight gain due to difficulty sucking and eating, hearing loss due to untreated ear infections, unintelligible speech due to incompetent lip and palate, extensive oral disease and dental disease due to unerupted and malposed teeth, and psychological damage due to teasing.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------

SP # 10

**PERFORMANCE MEASURE:**

Percentage of licensed home and child care centers who offer snacks or meals that include fruits and vegetables.

**GOAL**

Decrease the prevalence of overweight and obesity among children and increase the percentage of children eating the recommended daily number of servings of fruits and vegetables.

**DEFINITION**

**Numerator:**

Number of licensed home and child care centers that offer snacks or meals that include fruits and vegetables.

**Denominator:**

Total number of licensed home and child care centers that offer snacks or meals.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 19-5 and 19-6

Increase the proportion who consume at least 2 daily servings of fruits to 75% and increase the proportion who consume at least 3 daily servings of vegetables (with at least 1/3 dark green or orange) to 50%.

**DATA SOURCES AND DATA ISSUES**

**SIGNIFICANCE**

Good nutrition and healthy eating habits beginning at a young age are essential for proper growth and development and establishing healthy eating behaviors that are more likely to continue into adulthood. Healthy eating behaviors help prevent childhood and adolescent health problems such as overweight, eating disorders, dental carries, and iron deficiency anemia. Furthermore, good nutrition among children and adolescents helps prevent serious health problems in adulthood, including heart disease, cancer, and stroke – the three leading causes of death among adults. In Alaska, recent Anchorage School District data showed that more than one-third of the students assessed were overweight or at-risk of overweight, and of students entering kindergarten or first grade, 32% were overweight or at-risk for becoming overweight. Furthermore, Iron deficiency anemia is a serious problem among Alaska Native children and other minorities in Alaska. The anemia rates among Alaska Native children ages 1-5 years are more than twice the national average.

**OBJECTIVE**

2006	2007	2008	2009	2010
------	------	------	------	------
